## 2019 SUSTAINABILITY REPORT

## Norris Quarries Levee Restoration<sub>m</sub>

The Missouri River endured higher than normal water run off during a three-month period in the spring of 2019. This amount was in excess of over one million acre-feet of what is typically seen during the same months in any prior year. Consequently, a state of emergency was issued by Governor Mike Parson. Despite the challenges presented by the flooding, we worked around the clock in order to meet community demands. We are immensely proud of our teams for being able to provide the necessary material in a timely, and most importantly safe, manner. We sold a historic 1.4 million tons during 2019 for levee repairs along the Missouri river.

## Step Up to Stomp Out Hunger Challenge

Con-Agg hosted their 2nd annual Step up to Stomp Out Hunger challenge. For the second consecutive year, employees combined making a healthy life change with aiding those less fortunate by walking over a combined 1,000 miles. By doing so, the company successfully raised and donated \$14,500.00 to the Food Bank for Central & Northeast Missouri.

## Razorback Concrete Gives Back

In August of 2018, Razorback Concrete started a workplace giving campaign to raise funds for St. Jude Children's Research Hospital. Employees were given the opportunity to donate through weekly payroll contributions. We are proud to announce that through this initiative we were able to raise \$14,250.00 in 2019 for the hospital.

We are equally thrilled to announce that our pink Razorback mixer truck raised \$2,500.00 for Concrete Cares. This wonderful organization helps families relieve some of the financial burden that comes along with a cancer diagnosis. They help local families pay for mortgage payments, car payments, and utilities while in treatment.

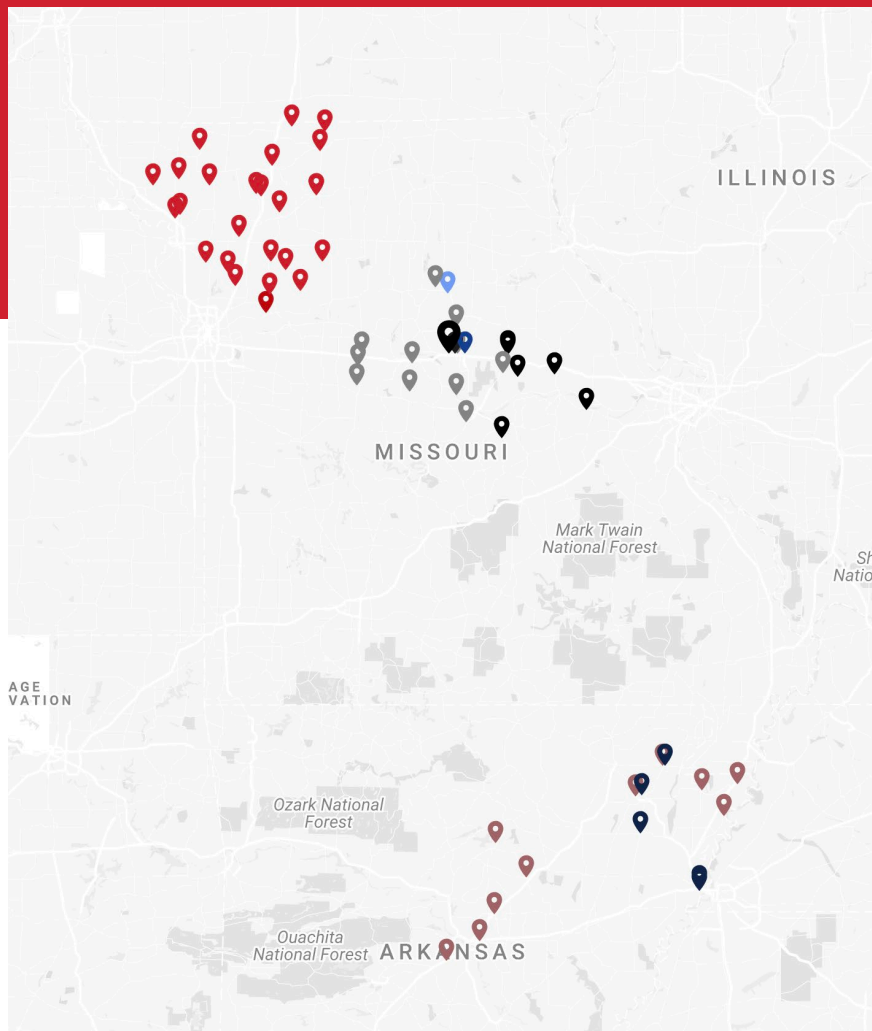

## MLPA Award

Con-Agg's Boone Quarries division received a Safety Commendation from the Missouri Limestone Producers Association in recognition of having the best safety record in the State of Missouri for 2018.

Crushed stone production is a vital industry in the state of Missouri. Con-Agg employs roughly 10% of the population that works within the aggregate business across the state. Every company strives to keep their employees, and the safety of their employees, as their top priority. Receiving recognition from within our industry is something that Con-Agg is deeply proud of.
